## SUMMARY

I have over 5 years of professional experience, starting my career journey while pursuing my university education, balancing both work and studies. I worked full-time for more than 3 years before transitioning to contract-based roles to gain diverse experiences, tackle new challenges, and enhance my professional and academic skills.

Currently, I am eager to expand my knowledge in the IT field, including web development, cloud computing, and other technical areas. I strongly believe in continuous learning and skill development to achieve excellence and contribute effectively to organizational goals.

## EXPERIENCES
